45.3.2 Fair Value of Financial Asset and Financial Liability carried at amortised cost

The carrying amounts of current investments, trade and other receivables, cash and cash equivalents, trade and other payables are considered to be the same as their fair values due to their short term nature. The carrying amounts of borrowings taken for short term or borrowings taken on floating rate of interest are considered to be close to the fair value.

45.4 Financial Risk Management Objectives

In course of its business, the Company is exposed to certain financial risks that could have significant influence on the Company's business and operational / financial performance. These include market risk (including currency risk and interest rate risk), credit risk and liquidity risk.

The Management reviews and approves risk Management framework and policies for managing these risks and monitor suitable mitigating actions taken by the management to minimise potential adverse effects and achieve greater predictablity to earnings.

In line with the overall risk management framework and policies, the treasury function provides services to the business, monitors and manages through an analysis of the exposures by degree and magnitude of risks

45.4.1 Market Risk

Market risk is the risk or uncertainty arising from possible market price movements and their impact on the future performance of a business. The major components of market risk are foreign currency exchange risk and interest rate risk.

44.4.1.1 Foreign Currency Risk Management

The company has overseas subsidiaries which are however are not material subsidiaries. Net amount payable / receivable are not hedge and company is hopeful of recovering the same in ensuing financial year. There are no other foreign currency risk exposure to the Company.

44.4.1.2. Interest rate risk.

The Company is not exposed to interest rate risk because of borrowal of funds at fixed interest rates. The company's exposure to interet rate on borrowings are detailed in note 19.

45.4.2 Credit Risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Company. The maximum exposure to the credit risk at the reporting date is primarily from trade receivables. The customer profile consists of around 70-80% from Govt. Sectors

The company's exposure to credit risk for trade and other receivables by type of counterparty are as follows

Particulars	Percentage to Total Trade receivables	
	As at 31 Mar 2026	As at 31 Mar 2025
Govt companies	71.61%	71.19%
Others	28.39%	28.81%

45.4.3 Liquidity Risk

The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The Company manages liquidity risk by maintaining sufficient cash and cash equivalents including bank deposits and availability of funding through an adequate amount of committed credit facilities to meet the obligations when due. Management monitors rolling forecasts of liquidity position and cash and cash equivalents on the basis of expected cash flows. In addition, liquidity management also involves projecting cash flows considering level of liquid assets necessary to meet obligations by matching the maturity profiles of financial assets &liabilities and monitoring balance sheet liquidity ratios.
